

Checklist: Projects

Use this checklist to
evaluate your project.

If you'd like to review the key concepts included in this checklist, we recommend revisiting the section on practice activities for competence-based courses. Evaluating your project will ensure your activity is high quality and effective for teaching what you set out to teach.

Project is relevant to the course goal and teaches the skills of the section or course

Project can be used to showcase what the student has learned (e.g. on their resume or in a portfolio)

Project gives students space to be creative while working through the project

Project includes downloadable resources, if necessary, that students can refer to while working on their project

Instructor tells students how they can get help if they're stuck

Project instructions clearly state the goals of the activity, estimated time & materials needed

Instructor shows possible answers to the project and/or provides evaluation checklists in a subsequent lecture to help students evaluate their work and reflect
